

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

60. *HELICONIUS GUARICA*, nov. sp.

Upper surface dark brown, glossed with bluish black; anterior wings crossed by a broad central transverse scarlet band, abruptly terminating after the first median veinlet, and not touching the outer margin; posterior, immaculate.

Underneath, the band becomes pale rosy white, edged only with dark pink; the costa of forewings, presents a short basal scarlet bar, that of the hind wings a longer yellow one; upon these are also five basal spots, one yellow, surrounded by four scarlet ones.

Body black, with some yellow stripes on thorax below and a yellow ventral stripe; some yellow spots on the collar; first and second joints of palpi yellow; third black. Antennæ black.

Expanse 2.65 inches.

Hab.—Insagasugá, New Granada. (Coll. Tryon Reakirt.)

Closely allied to *Hel. Hydara*, Hewits, but constantly differs in the absence of a scarlet spot on the upper side of the secondaries.

In the same number (63) of his "Exotic Butterflies," he has redescribed *Callidryas Thauruma*, Reakirt, as *Call. Fiaduna*; his name must therefore be regarded as a synonym.

March 3d.

MR. VAUX, Vice-President, in the Chair.

Twenty-three members present.

March 10th.

The President, DR. HAYS, in the Chair.

Forty members present.

The following papers were presented for publication:

"A new species of *Osmerus*." By Thaddeus Norris.

"Description of nine new species of Unionidæ, from Lake Nicaragua, C. A." By Isaac Lea.

"An examination of the Reptilia and Batrachia obtained by the Williams College Expedition to Equador and the Upper Amazon, with notes on other species." By Edw. D. Cope.

A letter was read announcing the death of Sir David Brewster.

The Publication Committee announced the issue of No. 4 of the Proceedings for 1867.

March 17th.

The President, DR. HAYS, in the Chair.

Thirty-three members present.

Mr. Benj. Smith Lyman made the following remarks on a bent marble stone presented by Mr. Edward Shippen to the Academy.

The bent gravestone of Dr. William Shippen, who died 11th July, 1808, and of Alice his wife, who died 25th of March, 1817, was formerly in the 1868.]
